VIII. Information on the Requirement/Voluntariness to Provide Data:

You have to provide your data in order to take part in the recruitment process and study at the University.

If you do not provide your data, we may refuse your matriculation, making and entering into the agreement, and you may lose the right to study at the University of Warmia and Mazury in Olsztyn.

☒ I have read and accept the above information

Consent to the processing of personal data

I agree to the processing of personal data by the University of Warmia and Mazury in Olsztyn with headquarters at ul. Michała Oczapowskiego 2, 10-719 Olsztyn for the purposes of recruitment for studies, statistical and archival.

Please be advised that your consent may be revoked at any time by providing a withdrawal form of consent to the UWM Data Protection Inspector, which can be downloaded from: [www.uwm.edu.pl/daneosobowe](http://www.uwm.edu.pl/daneosobowe). Withdrawal of consent will not affect the lawfulness of the processing which has been carried out on the basis of your consent prior to its withdrawal.

Be careful while filling the “Education”. Fill in information regarding Secondary education and then do the same for Higher education.

Education

While typing your personal data, remember that if you're enrolled, your data will be uploaded to university systems and printed on university issued documents. In Polish, proper names (such as school names, city names) are written with a capital letter. Only the first letter should be capital, not all of them. Do not enter Cyrillic or Chinese characters, use Latin transcription instead. Do not put spaces or any other punctuation in document numbers.

*Depending on applications you want to create, you need to add respective certificates concerning your education or other qualifications. In some cases you can add documents without entering all the information about them. However, you might need to fill in the missing data before printing the documents.*

\* - Fields marked with asterisk symbol are required.

### Environmental Engineering - second-cycle, full-time, in the field of: 1. Environmental Biotechnology 2. Process Engineering and Environmental Protection 3. Biotechnology (intra-year recruitment)

#### Environmental Engineering - second-cycle, full-time, in the field of **Environmental Biotechnology**

We offer a Master's course in Environmental Biotechnology for international students. Environmental Biotechnology is an exciting, fast-growing interdisciplinary field with excellent career opportunities. Our graduates with a Master's degree in this field possess skills in engineering and molecular biology that are in demand in a wide range of industries and scientific fields. Our teachers have years of experience in teaching international students. They are actively involved in the field, with a variety of ongoing research programs and many international publications. We are committed to both practical and theoretical education, so our Master's students work with us on our research projects in our modern laboratories. The programme of Environmental Biotechnology assumes interdisciplinary knowledge and skills, including a combination of methods of molecular biotechnology, chemistry and environmental technologies for the protection and sustainable use of the environment.

#### Qualifications

Graduates possess advanced knowledge of natural sciences. They have technical expertise in the field of biotechnology, including bioenergy technologies. They can solve problems related to the use of the natural environment using various technologies, including remediation. They use molecular techniques as a tool to draw conclusions about the state of the environment. When dealing with damage to the environment, they can identify the risks and take action to restore environmental balance. Our graduates understand the desirability of continuing education, professional development and international cooperation, and are well prepared for doctoral studies if they choose this career path.

#### Professional permissions

Our graduates are prepared to work in companies that use innovative solutions in environmental biotechnology, including the exploitation of technological systems used in the environmental protection and design and operation of solutions used for renewable energy production. Our graduates are well prepared for a successful career in industry or academic international institutions.

#### Requirements

The course is open for applicants who have successfully completed a Bachelor's degree with 210 ECTS or equivalent, or applicants who have completed a Master's degree in one of the following areas: biotechnology, environmental engineering, chemical and process engineering, environmental protection, civil engineering, chemical technology or similar. The admission procedure requires the Bachelor's Degrees Diploma with a transcript of records.

#### Table of contents
