

TEMATYKA PRAC DYPLOMOWYCH MAGISTERSKICH - studia stacjonarne drugiego stopnia (oferta w j. ang)  
ROK AKADEMICKI 2019/2020  
Instytut Geodezji

Wydział Geodezji, Inżynierii Przestrzennej i Budownictwa

Promotor	Temat pracy dyplomowej magisterskiej	Krótką charakterystyka pracy
Dr hab inż. Wojciech Jarmolowski	Program for coordinate transformations in ITRF and ETRF realizations	The objective of the work is to prepare a program transforming set of points with global coordinates between different systems (realizations) of global geocentric frames.
Dr hab inż. Wojciech Jarmolowski	Sea Surface Topography from Jason-2 satellite in the selected region.	The objective of the work is to select time series of observations of sea surface topography in a selected area and to interpolate and present maps of sea surface topography and its changes.
Dr hab inż. Wojciech Jarmolowski	Sea Surface Topography from Cryosat-2 satellite over Baltic Sea.	The objective of the work is to select Cryosat-2 observations, assessment of the quality and creation of Sea Surface Topography map of the Baltic Sea with the help of geostatistical tools.
